Handwritten text in a column on the left page, featuring various symbols and numbers. A red rectangular box highlights a section in the middle of the column.

Main body of handwritten text on the left page, consisting of multiple columns of symbols and numbers.

Handwritten text in a column on the right page, starting with a red initial 'L'.

Handwritten text in a column on the right page, continuing the notes or calculations.

Handwritten text in a column on the right page, including a table of numbers and symbols.

1. The first part of the document is a list of names and dates, which appears to be a record of some kind. The names are written in a cursive script, and the dates are in a more formal, printed style. The list is organized into columns, with names in the first column and dates in the second column.

2. The second part of the document is a series of handwritten notes or entries. These are written in a cursive script and are organized into a list format. Each entry appears to be a separate note or entry, possibly related to the names and dates in the first part.

3. The third part of the document is a series of handwritten notes or entries, similar to the second part. These are also written in a cursive script and are organized into a list format. The notes appear to be related to the first two parts of the document.

4. The fourth part of the document is a series of handwritten notes or entries, similar to the previous parts. These are written in a cursive script and are organized into a list format. The notes appear to be related to the first three parts of the document.

5. The fifth part of the document is a series of handwritten notes or entries, similar to the previous parts. These are written in a cursive script and are organized into a list format. The notes appear to be related to the first four parts of the document.

The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \int_0^x f(t) dt$. It is shown that $f(x)$ is a constant function, and the value of this constant is determined.
